

A film to inspire, educate & entertain the whole family

In WONDERS OF THE SEA, the descendants of eminent undersea explorer/filmmaker Jacques Cousteau travel the world to capture on film the beauty and fragility of the planet's intricate ocean ecosystems. From Fiji to the Mediterranean, Jean-Michel Cousteau and his children Celine and Fabien embark on a voyage to discover the ocean's wonders as never before seen... and learn about the threats that put them at risk...

"A feast for the eyes" The Hollywood Reporter

"Breathtakingly beautiful" Variety

Narrated, produced by & featuring renowned environmentalist Arnold Schwarzenegger, WONDERS OF THE SEA showcases our vibrant underwater world in a film that will inspire, fascinate, educate and entertain viewers of all ages. Says Arnold:

"Hello! Throughout the years I've done so many different kinds of work, but never this kind: narrator of a documentary film. So why now? Why this film? Because it is an important film, with an important message, created by a man that I've admired for years, Jean-Michel Cousteau. When I first saw the footage, I was blown away, so I knew I wanted to be involved in some way. And that's precisely Jean-Michel's aim: to get people involved. Jean-Michel reminds us that we all need to contribute to the change that must come. That the decisions our leaders make, the choices we individuals make will determine the future of the ocean, and our own survival on planet Earth." – *Arnold Schwarzenegger*
